Contract Opportunities

The Yukon Environmental and Socio-economic Assessment Board (YESAB) conducts environmental and socio-economic assessments across the Yukon. Technical specialists may be needed, from time to time, during the review of project proposals and the assessment of potential environmental and socio-economic effects related to proposed projects.

YESAB maintains a source list of pre-qualified suppliers capable of providing a variety of technical expertise and support. In particular, expertise may be required in the following areas:

Project Activities:

- Mine development, mineral exploration
- Land development (agriculture, subdivisions, etc.)
- Petroleum exploration and development
- Forestry
- Municipal and other infrastructure
- Transportation and access construction
- Contaminants and waste management

Potential Project Effects on:

- Soils and surficial geology
- Hydrology and water quality (both surface and ground)
 - Hydrogeochemistry and ARD/ML and the resulting predictions of water quality
 - Surface and sub-surface hydrological modeling
- Air quality and movement
- Terrestrial ecology (vegetation, wildlife, birds)
- Aquatic ecology (fish, benthos etc.)
- Local family, group and community social and economic conditions

Should you wish to be considered for our source list, please send us all of the following:

- 1. Your resume or your business information;*
- 2. A short description of the services you can provide; and*
- 3. A rate sheet for those services.*

Your particulars will remain active on our list for a period of two fiscal years; after which you will be required to resubmit or update your information.
